## Description

Genome and assembly reports from the NCBI genomes FTP

## Usage

```
reports(file, assembly = FALSE, ...)
```

## Arguments

file	file name, if missing then the files in the FTP directory are listed
assembly	use ASSEMBLY_REPORTS directory, default is GENOME_REPORTS
...	additional options passed to read_delim

## Details

Uses read\_delim in the readr package to read genome or assembly reports in the genomes FTP

## Value

A list of files if file name is missing, otherwise a data.frame with class c("tbl\_df", "tbl", "data.frame").  
If dplyr is loaded, then printing will return the first ten rows and not the first 10,000.
